DETAILED ACTION

Claims 1-14 and 20 are currently pending in the instant application, appear allowable over the prior art of record and have been renumbered as claims 1-15. Applicants' amendment filed 29 March 2010 has overcome the objection to the specification by inserting the continuing data and has overcome the objection to claim 12 for minor informalities.

Sequence Disclosure

The amendment filed 29 March 2010 complies with the requirements of 37 CFR 1.821-1.825 and therefore Applicants have complied with the requirements for patent applications containing nucleotide sequence and/or amino acid sequence disclosures. filed the necessary information to comply with the requirements of the sequence rules.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance. This invention relates to products of the formula I. The novel and nonobvious aspect of this invention involves the specific substituents on the formula I. The closest prior art of record fails to teach or suggest applicants' instantly claimed invention. The previous 35 USC 103(a) rejection over WO 2004/052847 presented in the non-final rejection of 23 June 2009 was overcome as the prior art reference has been disqualified under 35 USC 103(c) since the cited reference and the presently claimed invention were owned by, or subject to an obligation of assignment to the same entity.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
